

多站点主机-Linux 如何开设邮局

美国 cpanel 空间，提供域名邮箱，使用方便

本文讲解如何在 Cpanel 控制面板中添加邮箱，创建邮件账户的方法

cpanel 空间设置邮箱，添加邮件账户，非常简单，只需要 2 步

1. 登录 cpanel 后台，点击“电子邮件账户”(Mail Accounts),进入邮箱账户设置页面，操作如下图：

2. 依次填写邮箱用户名,选择域名,密码,邮箱大小,然后点击“生成”按钮(create)。

如下图所示

A screenshot of the cPanel 'Create Email Account' form. The form has several fields: '电子邮件:' with 'admin' in the input box, a red label '邮箱名', a green checkmark, and a dropdown menu with 'cpanel123.com' and a red label '选择域名'; '密码:' with '*****' in the input box, a red label '密码', a green checkmark, and a 'Generate Password' button; '密码强度:' with a progress bar and the text '确定 (60/100)'; '密码(再次):' with '*****' in the input box, a green checkmark, and a red label '重复密码'; '邮件配额(可选):' with '20' in the input box, a green checkmark, and a red label '为邮箱分配的空间大小' followed by 'MB'. A red box highlights the '生成' (Generate) button at the bottom left. The cPanel logo 'cpanel123.com' is visible in the bottom right corner.

邮箱帐户已经创建完毕
