

分销主机-Linux 为客户开设空间

首先打开您刚刚购买的 whm 控制面板找到 PACKGES 先定义您所要开通的主机的一些参数，（可直接理解创建套餐的参数）后面创建账号需要用到

1、打开后进去设置页面如下：

The screenshot shows the WHM interface for adding a new package. On the left is a sidebar menu with categories like 'Server Configuration', 'Support', 'Locales', 'Cluster/Remote Access', 'Account Information', 'Account Functions', 'Multi Account Functions', 'Themes', 'Packages', and 'DNS Functions'. The 'Packages' section is expanded, showing options like 'Add a Package', 'Delete a Package', 'Edit a Package', and 'Feature Manager'. The main content area is titled 'Main >> Packages >> Add a Package' and contains a form with the following sections:

- Add a Package**: A text input field for '新包名' (New Package Name) with the value 'test'.
- Resources**: A list of resource limits, each with a text input field:
 - 配额 (MB) (Quota (MB)): 1024
 - 带宽 (MB) (Bandwidth (MB)): 1000
 - 最大 FTP 帐户 (Maximum FTP Accounts): 1
 - 最大电子邮件帐户 (Maximum Email Accounts): 1
 - 最大电子邮件列表 (Maximum Email Lists): 1
 - 最大数据库 (Maximum Databases): 1
 - 最大子域 (Maximum Subdomains): 1
 - 最大暂停域 (Maximum Suspended Domains): 0
 - 最大附加域 (Maximum Add-on Domains): 0
- Settings**: A section for additional configuration:
 - 专用 IP (Dedicated IP): ☐
 - Select Options: Two checked checkboxes for 'FrontPage 扩展' (FrontPage Extension) and 'CGI 访问' (CGI Access).
 - cPanel 主题 (cPanel Theme): A dropdown menu set to 'x3'.
 - 功能列表 (Feature List): A dropdown menu set to 'default'.
 - Locale: A dropdown menu set to '中文' (Chinese).

At the bottom of the form is a blue button labeled '添加' (Add).

您可以自行设置这些参数,方便下一步创建账户操作。同时您可以在下图所示的地方对您所创建的套餐进行管理、删除、修改。

2、接下来我们需要将建立的数据包和域名以及 cpanel 绑定起来,您在 WHM

面板找到

Domain Information

Domain:	<input type="text"/>	
Username:	<input type="text"/>	! Username cannot start with
Password:	<input type="password"/>	
Re-type Password:	<input type="password"/>	
Strength (why?):	Very Weak (0/100)	Password Generator
Email:	<input type="text"/>	

domain 填写您的域名即主机名方便以后管理查找

username 输入用户名作为新开的主机的 cpanel 控制面板用户名(为了安全注意用户名不能以数字开头)

Password 您可以自行设置也可以使用“ Password Generator” 系统随机密码，
Email 可以填写用户的邮件地址。

Choose a Package 这个是选择您刚刚所创建的主机套餐参数把鼠标移至搜索图标会出现您刚创建的一些参数。

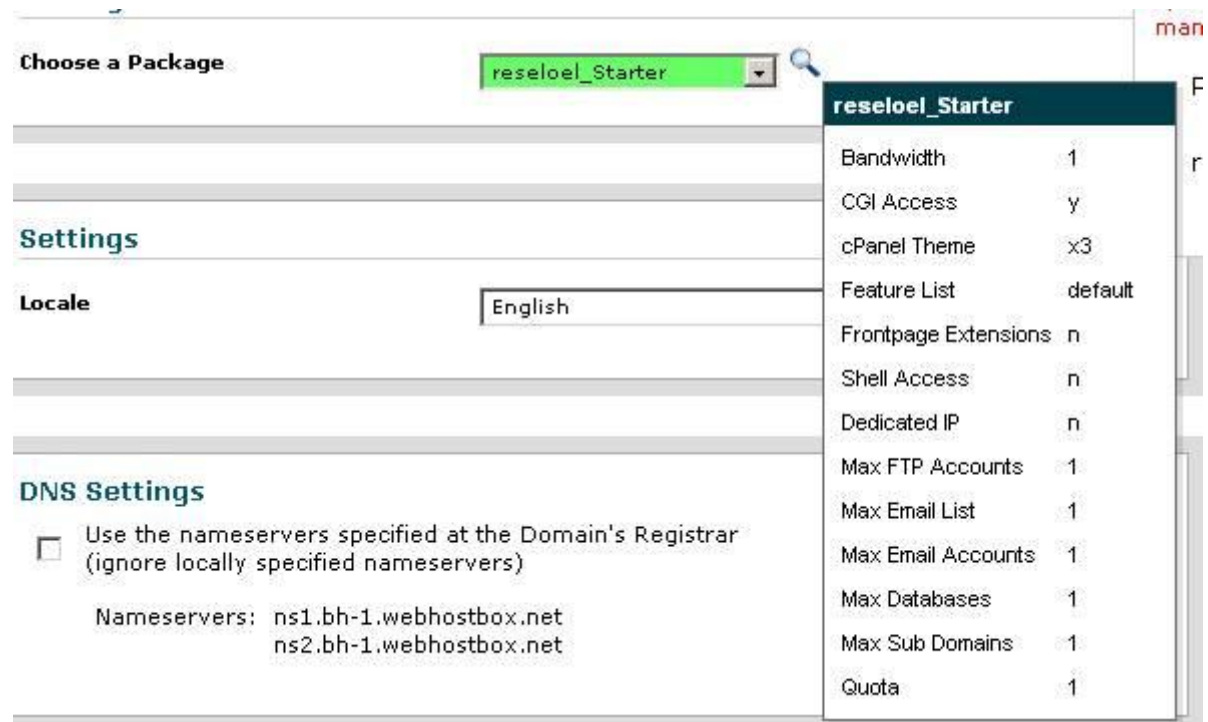

LOCALE 选择控制面板的默认语言：选择 Chinese 即 “简体中文版”

DSN settings 选择系统默认的即可

Mail Routings Settings 选择默认的即可

最后点击“Creat” 至此一个客户主机开通完成

The screenshot shows the 'Choose a Package' section with 'reseloel_Starter' selected. Below this is the 'Settings' section, which includes a 'Locale' dropdown set to 'English'. The 'DNS Settings' section has a checkbox for 'Use the nameservers specified at the Domain's Registrar' which is unchecked, and a text area for 'Nameservers' containing 'ns1.bh-1.webhostbox.net' and 'ns2.bh-1.webhostbox.net'. On the right side, a dropdown menu for 'reseloel_Starter' is open, showing a list of features and their values: Bandwidth (1), CGI Access (y), cPanel Theme (x3), Feature List (default), Frontpage Extensions (n), Shell Access (n), Dedicated IP (n), Max FTP Accounts (1), Max Email List (1), Max Email Accounts (1), Max Databases (1), Max Sub Domains (1), and Quota (1).

3、管理刚才所开通的账户

点击 List Accounts 进入账户列表

The screenshot shows the 'Account Information' menu with the following options: List Accounts (账户列表), List Parked Domains, List Subdomains, List Suspended Accounts, Search Accounts, and View Bandwidth Usage. The 'List Accounts' option is highlighted in red.

Go

1

CPanle 控制面板管理地址

1

[Fetch CSV](#)

可以通过上面的这些条件来进行搜索
